PROFESSIONAL SUMMARY

AI Data Annotator and Frontend Engineer with experience in multimodal AI evaluation, RLHF/SFT workflows, and frontend web development.

Worked extensively on AI training and evaluation projects involving video, audio, image, text, and code-based assessment tasks, including response evaluation, preference ranking, instruction-following analysis, quality review, and guideline-based annotation workflows.

Hands-on experience reviewing AI-generated and real-world multimedia content for quality, consistency, clarity, realism, and policy adherence across evolving evaluation standards.

Alongside AI evaluation work, brings 5+ years of frontend and UI engineering experience building responsive and production-ready interfaces using HTML5, CSS3, JavaScript, React.js, Drupal, and WordPress.

Strong attention to detail, pattern recognition, visual consistency, and analytical reasoning developed through both UI engineering and AI evaluation workflows.

CORE SKILLS

AI Training, Annotation & Evaluation

RLHF (Reinforcement Learning from Human Feedback), SFT (Supervised Fine-Tuning), Multimodal Annotation, Video Annotation, Audio Annotation, Image Evaluation, OCR & LaTeX Review, AI Output Evaluation, Response Evaluation, Preference Ranking, Instruction Following, Reasoning Analysis, Quality Review, Prompt Understanding, Guideline-Based Assessment

Multimedia & Content Review

Video Quality Assessment, Audio Review, Visual Consistency Analysis, Content Moderation Awareness, Realism & Composition Evaluation, Attention to Detail, Accuracy Verification, Annotation Workflows

Coding & Technical Evaluation

Code Review, Programming Reasoning, JavaScript (ES6+), Frontend Debugging, API Understanding, Technical Analysis, Problem Solving

Frontend & Web Technologies

HTML5, CSS3, JavaScript, React.js, Responsive Design, Mobile-First Development, REST API Integration, Component-Based Architecture, UI Engineering

CMS & UI Systems

Drupal Theming, WordPress, Layout Systems, Typography, Cross-Browser Compatibility, Responsive UI Development

Tools & Platforms

Git, GitHub, Postman, Hubstaff, Multimango, Overleaf

PROFESSIONAL EXPERIENCE

AI Data Contributor / Generalist Evaluator (Contractor)

Outlier AI — Remote

11/2024 – present

- Contributed to AI model training and evaluation workflows using RLHF (Reinforcement Learning from Human Feedback) and SFT (Supervised Fine-Tuning) methodologies.
- Worked on multimodal annotation and evaluation tasks involving video, audio, image, text, code, and document-based content assessment.
- Evaluated AI-generated and real-world multimedia content for quality, realism, clarity, composition, consistency, and instruction adherence using detailed project guidelines and rubrics.
- Performed video and audio annotation tasks focused on quality assessment, content review, transcription alignment, and multimodal evaluation workflows.
- Participated in OCR and LaTeX-based document annotation tasks involving mathematical expressions, structured formatting, multilingual content review, and accuracy verification.
- Performed response evaluation, preference ranking, reasoning analysis, and quality review tasks across multiple AI training projects including the Aether workflow.

- Participated in coding-related evaluation tasks involving technical reasoning and code understanding with exposure to JavaScript and Python-based workflows.
 - Completed 300+ evaluation and annotation tasks while maintaining strong accuracy, consistency, attention to detail, and guideline compliance across evolving project standards.
-

Frontend Developer (JS-heavy Drupal Theming – Contractor)

ConstructAfrica (via MSTechLabs) — Remote

07/2023 – 04/2024

- Led frontend implementation for two business platforms, focusing on clean, responsive, and production-ready UI.
Platform: <https://constructafrica.com>
 - Built and refined responsive layouts using Drupal theming, with strong emphasis on spacing, structure, and consistency.
 - Developed reusable UI components and handled dynamic frontend behavior using JavaScript within Drupal templates.
 - Ensured cross-browser compatibility and maintained clean, responsive scalable styling across the application.
-

Senior Frontend Engineer (HTML5 / CSS3 / JavaScript / Svelte)

Able.do (formerly Uncommon Design Services) – Remote | Hyderabad

08/2022 – 07/2023

- Built the Able platform using modern JavaScript and Svelte with custom JavaScript-driven animations.
Platform: <https://www.able.do/>
 - Worked on a second animation-heavy project for **Keus**, implementing complex UI animations using **GSAP** and selective **Three.js-based motion effects**.
Platform: <https://www.keus.in/>
 - Implemented responsive, mobile-first layouts and performance-optimized UI components.
-

Frontend Developer L2 | React.js, Drupal Theming

Axelerant — Remote

02/2021 – 08/2022

- Built responsive, scalable UIs using Drupal theming and ReactJS for enterprise clients like [OHCHR](#)
 - Built reusable components and layout systems for enterprise applications.
 - Applied accessibility and SEO best practices to frontend implementations.
-

Software Development Engineer | React.js

GiveIndia Pvt. Ltd. — Bangalore, India

02/2019 – 02/2020

- Developed features for [GiveIndia](#)'s online donation platform using ReactJS, focusing on reusable components, state management, and enhancing performance for high-traffic donation flows.
 - Integrated REST APIs with React/Next.js into UI workflows.
 - Built responsive and user-friendly interfaces with strong attention to layout consistency, accessibility, spacing, and overall user experience across web and mobile views.
 - Collaborated with backend teams & UI/UX designers to integrate and handle REST APIs, ensuring seamless data flow, error handling, and reliable user interactions across critical donation journeys.
-

Software Engineer | React.js

Photon Infotech Pvt. Ltd. — Bangalore, India

08/2018 – 02/2019

- Contributed to [Photon's](#) corporate website using **React.js** and **Next.js**.
 - Implemented UI components aligned with corporate branding and design systems.
 - Developed responsive and reusable frontend components with a focus on clean UI structure, cross-browser compatibility, and consistent user experience across devices.
 - Collaborated with frontend and design teams to translate business requirements and UI mockups into production-ready interfaces.
-

Software Associate

IBM India — Bangalore, India (via Express IT Pvt. Ltd.)

11/2016 – 10/2017

- Worked for US telecom brand Boost Mobile which is now <https://www.telecompetitor.com/>

- Primarily used HTML5, Bootstrap, JQuery for feature patches and component creation.
 - Did CSS changes, Bug fixes, performance optimizations and gained real world exposure to SaaS products.
 - Refactored legacy UI components and styles, improving responsiveness, code maintainability, and ensuring consistent user experience across devices and browsers.
-

CERTIFICATIONS & COURSES

- **Generative AI for JavaScript Developers** – CodersGyan (Ongoing)
Focus: AI APIs, prompt engineering, tool-calling concepts, and AI-powered web application development
02/2026 – Present
 - **Google Prompting Essentials** – Coursera
Focus: Prompt engineering, AI productivity workflows, and responsible AI usage
03/2025 – 07/2025
 - **Meta Frontend Developer Professional Certificate** – Coursera
9-course professional frontend engineering program covering React, APIs, responsive design, and version control
07/2024 – 01/2025
 - **Acquia Site Studio Site Builder Certification**
Focus: Component-based Drupal site building and scalable UI systems
07/2022 – Present
-

VENTURE & SIDE PROJECT

Software Engineer & Founding Partner (Part-Time)

Velocity Kashmir Tour & Travels (V2)

04/2024 – Present

- Solely responsible for the [Velocity Kashmir Website](#) **end-to-end**: frontend development, backend form handling, deployment, and maintenance.
 - Built responsive, mobile-first UI using **HTML5, CSS3, and JavaScript** and PHP for form handling and capturing data.
 - Deployed and manage the production website on **Hostinger**, including updates and configuration and handle ongoing updates.
-

EDUCATION

Bachelor of Engineering – Computer Science

SSM College of Engineering & Technology
